

MOTORIZED THICKNESSER MACHINE

Model: S 41 ES

TECHNICAL DATA

Planer working width	410MM
Cutter block diameter (mm)/n. of knives standard	95/4
Min. ÷ max. working height on thicknesser	3 ÷ 240MM
Three-phase motor power starting from	5 (6) kW - 50 (60) Hz
Vertical Movement	Motorized

ADVANTAGES

Top performances: 95 mm diameter planer spindle with 4 knives. Strong and constant workpiece feed to thicknesser is granted by the helicoidal infeed roller. Perfect thicknesser finishing with the outfeed roller in sanded steel. Adjustable pressure on the thicknesser feeding rollers depending on the workpiece type to be machined, for an impeccable result.
